

Bike It Data Feed Guide

This guide explains the layout of the Data Feed, what certain column headers are for and how the data is broken up within certain cells. All Data Feeds will start in the same order so that the most important information is at the beginning of the Feed, SKU, Title, Pricing, Key Features, Short Description and Images. All the other product attributes will be after the Images.

1. The first 3 columns are made up of SKU, Parent and Variant_axis1. These columns show if the product is an individual product or part of a variation.
 - a. SKU is the product part number
 - b. Parent is the code that links variations together
 - c. Variant_axis1 shows the column header name of how the variation is broken down.
 - i. The example below shows how a helmet is grouped.

sku	parent	variant_axis1	helmet_size
ARH077L	ARHCITYONEJET18GANTHRACITE	helmet_size	l
ARH077M	ARHCITYONEJET18GANTHRACITE	helmet_size	m
ARH077S	ARHCITYONEJET18GANTHRACITE	helmet_size	s
ARH077XL	ARHCITYONEJET18GANTHRACITE	helmet_size	xl
ARH077XS	ARHCITYONEJET18GANTHRACITE	helmet_size	xs

2. The next 2 columns are Item_Title and Parent_Title.
 - a. Item_Title is the title of the product
 - b. Parent_Title is the title of the variation (eg without the size of the helmet)
3. The next 4 columns are Trade, SRP, Tax_Class and Barcode.
 - a. Trade is the trade price which excludes VAT
 - b. SRP is the Suggested Retail Price and includes VAT (where applicable)
 - c. Tax_Class is either 13 or 14. Vatable products are 13 and Non vatable are 14
 - d. Barcode is always an EAN number
4. The next 6 columns are made up as follows
 - a. Type: Shows if the product is a Road, Off Road, Cycle or a mixture of any.
 - i. If the product is a Road and Off Road the value will be separated by a comma. (eg: offroad,road)

- b. Family: This shows what group of products the items belong to.
 - c. Brand: This is the Brand of the product
 - i. If the Brand is more than one word, then the space is replaced by an underscore. (eg: Bike It will be written as bike_it)
 - d. Key_Features: This is a list of the Key Features / Bullet Points of the product.
 - i. Each Key Feature is separated by a pipe. (eg: Manual hand pump dispenser|Enables clean and efficient delivery|Fits 205L & 60L oil drums|)
 - e. Short_Description: The short description of the product is the general text description of the product.
 - i. This is made up of basic HTML so will only contain Breaks,
.
 - f. Image1 to Image15: These fields contain the URL to the product image.
5. The rest of the columns contain attributes giving further information about the products. Depending on what information is in the cell, the values in the cells may of had any spaces replaced with an underscore. The attributes below have specific coding to separate the information within the cells.
- a. Technical_Details: This column contains the technical information about certain products
 - i. Each column is separated by a # and each row is separated by #| as shown in the example below.
 - 1. Detail#Value#|Voltage (V)#12#|Capactiy 10HR(Ah)#19#|CCA#150#|Charge Current (A)#1.9#|Approx Weight (kg)#4.64#|Approx Acid (L)#1.08#|Length (mm)#185#|Width (mm)#82#|Height (mm)#170#|
 - b. Cross_Reference: This column is used to cross reference with other brand part numbers.
 - i. Each column is separated by a # and each row is separated by #| as shown in the example below.
 - 1. Manufacturer#Partcode#|EBC#FA47#|FERODO#FDB705#|VESRAH#VD911#|
 - c. Colour_Swatch: This lists all of the colours found on a product.
 - i. Each colour will be separated by a comma. (eg: black,silver)
